## TESTIMONIALS.

OFFICE OF BURNHAM & ROOT, ARCHITECTS,  
115 Dearborn St., Chicago, June 28, 1882.

The Northwestern Terra Cotta Works have made a large amount of work for us since they began business, and it is with pleasure that we testify to their faithfulness and thoroughness, and to the reliability of the Terra Cotta they have manufactured. We have used material made by them in unusually heavy buildings where it was subjected to great pressure, and we have known of no case where there has been any failure.

BURNHAM & ROOT.

OFFICE OF W. L. B. JENNEY, ARCHITECT,  
Lakeside Building, Chicago, June 30, 1882.

*Messrs. True, Brunkhorst & Co.:* Gentlemen.—It gives me pleasure to contribute to the numerous favorable notices of your past work, with which I have been familiar from your earliest beginnings in this city to the present. I can testify to the general good character of the work, to the faithfulness with which my designs have been followed, and to the earnest endeavors you have always made that your work should in all respects be satisfactory.

Very respectfully, W. L. B. JENNEY.

OFFICE OF BURLING & WHITEHOUSE, ARCHITECTS,

*Northwestern Terra Cotta Works:* Gentlemen.—We take great pleasure in recommending the use of Terra Cotta to those not already familiar with its architectural effect and durability as a building material. The large amount used by us during the past years of both the grey and red Terra Cotta has given us entire satisfaction, and the prompt execution of all work does credit to your establishment. Very respectfully, BURLING & WHITEHOUSE.

OFFICE OF W. W. BOYINGTON, ARCHITECT,  
157 and 159 LaSalle St., Chicago, June 30, 1882.

*To whom it may concern:* This is to certify that I have used in various exposed places in important buildings, Terra Cotta, manufactured by the Northwestern Terra Cotta Works of this city, and have found the material to be a very superior article. And as it is used generally for ornamental or molded work, I most cheerfully say that the artistic skill with which they execute their work from given designs is most gratifying to an architect. I can recommend their work to any parties having an occasion to use the material at home or abroad.

Respectfully, W. W. BOYINGTON.

Being lighter, it will bear the freight to any distance. It can be made as ornamental as desired, at a minimum of expense. It is fully indorsed by the leading Architects of the country, and has been used in many of the largest buildings, both public and private, and given universal satisfaction. We manufacture every variety of Architectural detail from special designs, and shall be pleased to furnish estimates of cost, weight, etc., on application. We are constantly adding new designs to our stock of patterns, of which we will send sketches from time to time to those requesting them.

We require from three to four weeks in which to produce Architectural work. PLEASE ORDER EARLY, to insure prompt delivery of work. All work, unless ordered otherwise, is made with four inches bond to build into brick work, the same as stone.
